

Briotix Health's FocusLink

Briotix Health's FocusLink service eliminates barriers to return to work for companies with offsite and virtual placement programs that provide employees suitable work while recovering. Reduce workers' compensation costs, return-to-work timelines, and improve employee accountability with FocusLink.

FocusLink partners employers with non-profit organizations to identify temporary transitional employment for employees. Offering virtual on-site and off-site placements with non-profit organizations, FocusLink provides injured employees the ability to continue working.

Identify Transitional Opportunities

Providers analyze injured employees' abilities and match them to transitional assignments with non-profit organizations. Both virtual on-site and off-site placements within the identified non-profit organization are made available for potential assignments.

Prioritize Employee Well-Being

FocusLink works with employees to ensure they maintain full-earning potential while injured and maintain consistent schedules, as recommended by return-to-work plans, increasing rate of recovery and employee engagement.

Connect with Community Organizations

To align with corporate values, FocusLink providers identify local and national non-profit organizations that match your values, pairing employees with these organizations.

Provide Equitable Assignments

Utilizing online portals and off-site locations, FocusLink provides employees access to transitional work assignments regardless of injury. Providers continue to monitor and provide care during recovery.

Your Partner in Employee Health

Briotix Health's FocusLink assists you in overcoming obstacles to return to work in your workplace. Foster community ties, improve employee recovery, and maintain communications while reducing costs.
